

Outdoor Sauna Cover

Thank you for choosing Sun Home Saunas for your outdoor sauna experience.

We are pleased to inform you that we now include a sauna cover with our outdoor models to provide added protection.

Please take note of the following guidelines for using the cover effectively:

For Outside Use

Your Sun Home Sauna is intended for use outside but should be covered if directly exposed to rain or snow.

Enclosed Space Installation

If your sauna is installed in an enclosed space such as a gazebo, garage, covered porch, or under a deck that shields it from direct exposure to the elements, the cover is not necessary.

Enjoy your sauna without the cover in these protected environments.

Weather Protection

For saunas placed directly in the weather without any protection, installation of the included cover is required at all times to safeguard your sauna and to maintain the warranty.

Failure to cover the sauna may result in damage that could void the warranty.

Once the cover is installed over your sauna, there is a zipper to open the cover so you can access your sauna.

Simply unzip the front and door when you get in your sauna and zip it back up when you get out.

Cover Features

Material: The cover is made of Oxford cloth, which is water-repellent and durable.

Simple Instructions

1. Drape the cover over the sauna and pull tight to fit
2. Opening on the front and door to open and close
3. Velcro on the door and front
4. Hammer stakes in to the ground to secure

Cleaning Instructions

*Monthly Maintenance: Hose off the cover with clean water on a monthly basis to prevent dirt from becoming deeply embedded.

*Thorough Cleaning: In most environments, a thorough cleaning will be needed every couple of years.

Thorough Cleaning Tips

*Use a natural soap, such as dishwashing liquid (avoid detergents).

*Only use cold to lukewarm water (never exceed 100 degrees).

*Air dry the cover and avoid applying heat.

By following these simple instructions, you can keep your sauna cover clean and maintain its quality over time.

The Sauna Cover comes with a 1-year craftsmanship warranty and a 5-year limited warranty on the material.

*If your sauna is under cover but will be used in very cold temperatures, you may consider installing the cover as it will act as a thermal jacket and allow your sauna to heat more efficiently.
